

FEDERAL POLICY BRIEF

This document provides a brief summary of some of our policies, principles and objectives and is an expression of our ongoing commitment to the people of Australia. The Major Parties in their time in power have given Australia an insecure future with their adoption and practice of the U.N. Policy - Agenda 21 - Globalisation, Deregulation, Privatisation, Free Trade and Tax. Under the Labor-Liberal policy of economic rationalism, casual and part time jobs have taken the place of full time employment. One nation believes in full time employment opportunities and re-industrialisation as essential to achieving this and Australia's security and prosperity. Despite attempts to stigmatise the 50's, it was a time that industry and employment prospered, engineering achievements were marvelled at and Australia obtained amongst the highest living standards in the world. All accomplished through patriotic government, visionary planning, sound economic management and well-conceived legislation. This was achievable because of the Westminster system of government and our constitution that we had inherited, and today, instead of trying to destroy that system altogether, we should be embracing and enforcing it, because it is the foundation of Australian culture. No incoming government is bound by any treaty signed by previous governments; they all must be resigned to continue. The Liberal/National coalition should be held to account before the next election.

- ✓ One Nation will always raise important issues that require attention.
- ✗ Today's autocratic negligence. Australia has deregulated and privatised itself to its knees. It has betrayed it's populous by running down and dismantling their utilities and totally ignoring that infrastructure needs to be kept ahead of the pace of society. It's called foresight.
- ✗ Farms held in families for generations are virtually stolen from underneath by the greed and treachery of today's power brokers.
- ✗ Across Australia Your electricity, communications, rail, hospitals, water, have been treated with neglect with the intention to privatise. The department of Agriculture has suffered the same fate and soon will be virtually nonexistent.
- ✗ The ATO has become a monster to the common people. Local governments have become a burden on their shires. It will not be long before all our resources are sold and we become a third world country ourselves. **The proposed carbon tax is fraudulent and we oppose it 100%.**
- ✗ The greatest growth industry in Australia has become the bureaucrat, producing burdensome laws that create ever more red tape. They have deregulated all and sundry while at the same time regulated the individual into the ground.
- ✓ One Nation is for the regulation of essential services and industries, especially the Banking, farming and utility sectors. We believe in protection of our industry and borders.
- ✓ We believe in the commonwealth of Australia and not a republic. The Government must ensure that the Australian people retain their public utilities and that their services are not compromised.
- ✓ We stand for rational management of the environment, agriculture and Fisheries. Ensuring the maintenance of Fire trails in all National Parks and state forests. Giving Farmers and property owner's back the use of their land and livelihood.
- ✓ Responsible ownership of Firearms by Australian citizens for lawful purposes.
- ✓ The rights of responsible organisations and clubs to exist for recreational activities, e.g. Social, Fishing, Shooting, Flying, Horse and 4WD.

- ✓ Tariffs and subsidies for industries suited to their competition. Abolition of the GST for an equitable tax across all income.
- ✓ The overhaul of DOCS, Department of community services, and the CSA, Child support agency. To provide for a more humane provision of service.
- ✓ The rights of the established Family unit to be a mixed relationship, between husband and wife as equals.
- ✓ The Armed Forces and Intelligence Services need to be equipped and have the personnel to ensure that our country is secure.
- ✓ Pro water resource and management.
- ✓ Employment, with fair pay and conditions.
- ✓ The re-establishment of a competitive "Bank of Australia" and Government insurance office.

These initiatives will ensure that our country regains that of which our service men and women over generations have offered their lives to protect. We ask that you support us with your vote. We wish to safeguard the future and return our prosperity.

Contentious issues should be put to referendum at election; The Australian people can decide for themselves.

The rights of the Family.

Because of progressive and intrusive legislation, the Authority of the Parent is continually being eroded, the family unit itself broken down. We wish to strengthen and advocate traditional family values and uphold the institution of the family as essential to the well being of individuals and society as a whole. It is also our intention to give separated/divorced fathers as well as mothers the ability to re-establish their lives and gain more time with their children.

Apprenticeships.

One Nation supports the operation of an effective system of apprenticeships. We would encourage cooperation between governments at state and federal level, in order that employers can be subsidised to take on apprentices. We propose a subsidy of 75% in the first year, 50% the second and 25% the third. As a nation we have an obvious need to assist our young to obtain vocational skills with public funds for the national good.

Education.

One Nation is committed to a fundamental level of education that encompasses at the very least, writing, reading, spoken skills of communication and expression, combined with essential mathematics to ensure successful participation in society. A greater emphasis shall be placed upon education in science to new bench mark standards. The reintroduction of the concept of responsibility and the adoption of a respectful attitude towards each other, in particular parents, teachers, the elderly and society.

Health.

A Nationally funded public health system that has the capacity in Facility, Plant and Staff to cope with a National State of Emergency. Hospitals would also be returned to the control of the "Public Hospital Board". This will restore control to the local community. One Nation supports the re-introduction of funding for community care programs such as meals on wheels, home maintenance, community transport and home help services, which are essential for the elderly and disabled.

Public utilities and Privatisation.

One Nation recognises that our public utilities are essential commodities that should be owned by all Australians and protected from privatisation at all costs. Therefore the reversal of private ownership of all-essential public services and utilities ie. water, electricity, communications, the Commonwealth Bank and Insurance.

Taxation.

We wish to abolish the GST and its replacement with a tax that is not crippling of the common people. The Australian Tax Office - ATO will also be overhauled. One Nation perceives Payroll Tax as a tax on employment and is a major cost to employers. It and other inequitable taxes such as land tax will be reassessed with a view to a sizable reduction or total abolition.

Citizens Initiated Referendum.

One Nation supports direct democratic involvement of the Australian people, **(C. I. R.)** Simply, we have faith in the good sense and fair-minded attitude of Australians to make the wisest decision when they are given all the facts. It gives back to the people the opportunity to directly address the issues of real concern, all too often left unaddressed under the current system of election and government. It grants the people the right and ability to initiate legislation directly, without hindering the Westminster system of representative government. It provides the facility for Australians to raise their concerns for debate and public decision.

The Governor General.

We propose the Governor General be re-empowered, proclaimed head of state, while retaining and re-implementing "The Commonwealth of Australia" or "The Federation of Australia" with all its' mechanics, rights and responsibilities. All Commonwealth formalities, tradition and ties, would continue. The GG would be popularly elected with strict criteria, rules and guidelines. This person would watch over our politicians as an umpire would watch over a game or sport. SHE or HE would also preside over their income.

The intention of Science.

To advance Australia's scientific knowledge, influence in Space and associated entities, alternative energy sources, Funding for Research and Educational institutes. Restoring the CSIRO's credibility.

Public works and Ecological.

We shall endeavour to undertake public works wherever there is great need, such as river levy banks and other water and flood mitigation works. The re-channelling and capturing of otherwise lost excessive water. A return to sane and proven ecological management of land and resources. Conservation V's Preservation. (Refer to "Environment" Paper).

Pension and Veteran.

Our assurance of the continuation of all categories of pension's rights and benefits. Note: The softening up on the criteria (those once afforded) to Home Care allowance: The Full recognition, thus honouring, all Australian War and Conflict personnel: Also the maintenance / reclamation / repatriation of their remains, (where neglect and or vandalism have defaced and dishonoured their resting-place).

LIMA / GAT / WTO / IMF / Agenda 21 & Carbon Tax.

One Nation has stood fast and will continue to oppose any treaty that is detrimental to Australia, its people, industries and way of life.

"Your democratic solution to the two party system"

Join One Nation and help fight for a brighter future for our country.
